Repositioning Wellbeing to Maximise Children's Learning

# This IS ME!

School leaders are required to measure, plan and monitor children's wellbeing and consider their individual experiences. Playback's benchmarking model which uses the GIRFEC wellbeing Indicators, provides the ideal tool to digitally collect rich, robust data directly from children about their experiences at school. This enables pupils' voice through a rights based approach, and allows school leaders to assess children's needs, plan interventions and monitor impact including:

- additional in-school targeted support
- specialist input from external agencies
- child protection procedures

## This is Me! provides two digital surveys for:

- Nursery - Primary 2 (22 questions)
- Primary 3 - Primary 7 (34 questions)

This robust and meaningful method of gathering data provides a more contextualised learning experience for children and allows them to be more open and clear in their thinking.

## The school wellbeing report will provide the following data:

1. School Information and performance scores
2. All participating pupil data collated
3. A whole school report providing numbers and percentages for each survey question, class reports and average scores for each GIRFEC Indicator along with the school's overall performance scores
4. A dashboard providing the results from each survey question
5. Pupil Comments

6. Wider Achievement data about pupils' activities both in and outside the school
7. FSME comparative data scores for pupils who qualify for free school meal entitlement and those who do not.
8. Care Experience comparative data for pupils who have had previous, current or no experience of the care system
9. Quintile data
10. SIMD data in relation to deciles 1-10
11. Pupil data about how they rated their experience of completing the survey

## The features of our digital system include:

1. A designated school web site.
2. A secure URL and server.
3. A single user log in – multi users can complete at the same time.
4. Individual pupil reports accessed via the dashboard.
5. Compliance with GDPR.

Playback will produce 2 school reports with all statistics set out in graphical formats.

It is compatible with all digital devices including Ipads, Phones and QR Codes.

**NOTE:** If the school continues to complete the wellbeing survey over a period of years we can provide an accumulative report that will allow SMT to track and profile individual pupil experiences/information via a dashboard.
